VISTA RIDGE PIPELINE

VISTA RIDGE PIPELINE

SAWS' near term plan is two-pronged: reduce total usage with continued emphasis on conservation along with further diversification of the water supply.

- **Vista Ridge will supply up to 50,000 acre-feet per year of Carrizo / Simsboro Aquifer groundwater from Burleson County**
- **142 mile pipeline**
- **Supply starts in 2020**
- **Relieves pressure on environmentally sensitive Edwards Aquifer**

Central Texas Regional Water Supply Corporation

THE P3 AGREEMENT

The public-private partnership (P3) agreement transfers risk from SAWS and its ratepayers to Vista Ridge LLC.

- **Will provide 20 percent of San Antonio's water demand**
- **A decline in interest rates reduced the projected cost of the project by $529 million over 30 years.**
- **Global recognition for project**
