

**LEGAL COMMITTEE
WORK PLAN
July 1, 2022 to June 30, 2023**

1. STATE AND FEDERAL COLLABORATION REGARDING THE ADJUDICATION OF FEDERAL NON-TRIBAL WATER RIGHTS

Background: On July 15-16, 2014, the WSWC and WestFAST held a workshop in Helena, Montana to discuss ways to improve the resolution of federal non-tribal water rights claims and to begin the process of developing a clearinghouse of information that states and tribes can use to resolve these claims. The WSWC and WestFAST subsequently created a joint state-federal workgroup to help develop the clearinghouse and implement the other recommendations that emerged from the workshop.

Work-to-Date: The Committee created a Federal Non-Tribal Water Claims Subcommittee to evaluate ways the WSWC and WestFAST can improve the effective resolution of federal non-tribal water rights claims. The Subcommittee consists of WSWC members and WestFAST members, who serve in an *ex officio* capacity. Past webinars and workshops include:

| | |
|-------------------|--|
| November 10, 2015 | McCarran Amendment – state and federal perspectives |
| July 13, 2016 | Groundwater and Meeting Federal Water Needs (ND) |
| October 18, 2017 | Continuing State-Federal Relationships through the Implementation Phase of Decreed and Adjudicated Water Rights (NM) |
| October 24, 2018 | State and Federal Agencies’ Approach to Grazing Water Rights (ID) |
| October 15, 2019 | Grazing Water Rights (CO) |
| September, 2021 | Wild and Scenic Rivers (SD) |

As of March 24, 2020, the WSWC-WestFAST Clearinghouse is available on the Council’s website under Member Resources, and additional documents may be added by contacting Council staff.

2022-2023: The Committee will work to carry out the recommendations and next steps that emerged from the workshops and webinar. Under the direction of the Committee, the workgroup will hold calls on a quarterly basis to discuss the development of the clearinghouse and to serve as a forum for information sharing and relationship building. The Workgroup will also advise the Committee about potential future actions the WSWC and WestFAST may take to address federal water needs and may hold webinars on specific topics of interest. The workgroup will continue to hold workshops. Additional topics to pursue include (1) water rights related to Wild and Scenic Rivers, and (2) identifying useful principles for state-federal memoranda of understanding to develop a useful framework and recommended approaches.

Time Frame: Ongoing

Federal Non-Tribal Water Claims Subcommittee: Jay Weiner (MT), Jennifer Verleger (ND), Micheline Fairbank (NV), Todd Chenoweth (TX), Norm Johnson (UT), Buck Smith (WA), and Chris Brown (WY). WestFAST members and agency staff participating in the Subcommittee in an *ex officio* capacity include: Michael Higgins (U.S. Fish and Wildlife Service), Donald Anderson (Bureau of Reclamation), (National Park Service), Stephen Bartell (Department of Justice), Lauren Dempsey (Air Force) and Chris Carlson (U.S. Forest Service).

2. CWA JURISDICTION*

Work-to-Date: In 2011, the EPA and the U.S. Army Corps of Engineers released draft guidance intended to provide clearer, more predictable guidelines for determining which water bodies are subject to Clean Water Act (CWA) jurisdiction, consistent with the U.S. Supreme Court's decisions in *Solid Waste Agency of Northern Cook County v. U.S. Army Corps of Engineers*, 531 U.S. 159 (2001), and *Rapanos v. United States*, 547 U.S. 715 (2006). This was followed by the Clean Water Rule (2015 WOTUS Rule), finalized on June 29, 2015 (80 FR 37054). Many of our member states filed lawsuits challenging the 2015 WOTUS Rule in federal court. The 2015 WOTUS Rule was rescinded, and was replaced by the Navigable Waters Protection Rule (2020 WOTUS Rule), finalized on April 21, 2020 (85 FR 22250). Several of our member states filed lawsuits challenging the 2020 WOTUS Rule in federal court. On January 20, 2021, President Biden issued Executive Order 13990, *Protecting Public Health and the Environment and Restoring Science to Tackle the Climate Crisis*, directing EPA and the Corps to review the 2020 WOTUS Rule. On August 30, 2021 the Arizona U.S. District Court vacated and remanded the 2020 Navigable Waters Protection Rule to EPA and the Corps. The agencies halted implementation of the 2020 Rule, relying on pre-2015 guidance, and continued efforts toward the new rulemakings: (1) to codify the pre-2015 guidance, and (2) a new rule intended to be durable. On January 24, 2022, the U.S. Supreme Court granted the petition for certiorari in *Sackett v. EPA* (21-454).

WSWC adopted positions #369 and #373 regarding CWA rulemaking efforts and state-federal collaboration. Position #369 was revised and readopted as Position #410, while Position #373 was allowed to sunset and acknowledged as a letter with continued historical value. At the October 2018 meeting in Coeur d'Alene, Idaho, Position #410 was revised and readopted as #427, with the State of Washington abstaining from the vote. At the September 2021 meeting in Deadwood, South Dakota, Position #472 was again revised and adopted, with the understanding that further efforts would be made to improve the position the following Spring. WSWC sent various letters and comments to EPA and the Corps. At the April 2022 meeting in Arlington, Virginia, Position #481 was revised and adopted, replacing #472.

2022-2023: The Committee will continue to work with the Water Resources and Water Quality Committees through the Workgroup to follow and comment on federal actions regarding CWA jurisdiction in accordance with the WSWC's and WGA's positions, as well as consider the impacts of the new rule(s) on state policies, programs and regulations.

Time Frame: Ongoing

CWA Rulemaking Workgroup: Erica Gaddis (UT), Tom Stiles (KS), Jennifer Verleger (ND), and Julie Cunningham (OK).

*See Item 2(a) of the Water Quality Committee Workplan

3. AD HOC GROUP ON RESERVED INDIAN WATER RIGHTS

Work-to-Date: The Western Governors' Association (WGA) and WSWC have long supported the negotiated resolution of Indian water rights claims (WSWC Position #454). As a result, the WGA and WSWC have worked with the Native American Rights Fund (NARF) for over thirty years as part of an Ad Hoc Group on Reserved Indian Water Rights to promote negotiated settlements.

Over the years, the Ad Hoc Group has carried out a number of activities to support the negotiated settlement of Indian reserved water rights claims, including frequent trips to Washington, D.C. to support policies and legislation that facilitate settlements. A biennial symposium on settlements is held by the WSWC and NARF every odd year. The Group has also worked to highlight the need to secure a permanent funding mechanism for authorized settlements and to identify alternative funding sources to help ensure that settlements authorized by Congress and approved by the President will be implemented.

In recent years, the WSWC and NARF have established regular meetings with the Deputy Secretary of the Interior's Office, the Secretary of the Interior's Indian Water Rights Office, and other Interior and Department of Justice officials engaged in Indian water rights settlement efforts. The WSWC and NARF have also held regular meetings with the White House Office of Management and Budget and other White House officials to support the WSWC's settlement policies.

The 116th Congress passed legislation approving the Navajo-Utah settlement, the Confederated Salish and Kootenai settlement in Montana, increased funding and a time extension for the settlement in Aamodt in New Mexico, and approval for a 2-year NRCS study for a dam that would help settle the Kickapoo tribe water claims in Kansas.

2022-2023: The Committee will oversee WSWC's Ad Hoc Group efforts in the following areas: (1) activities to gather support for an appropriate remedy to settlement funding issues, including the development of a permanent settlement funding mechanism, the identification of other possible funding sources, and funding for federal assessment, negotiation, and implementation teams; (2) continue meeting with the Administration via quarterly conference calls and other face-to-face opportunities to discuss key issues associated with Indian water rights settlements, including possible modifications to the Criteria & Procedures; and (3) prepare to hold the 2023 Symposium on the Settlement of Indian Reserved Water Rights Claims in partnership with the Native American Rights Fund.

Time Frame: Ongoing

Reserved Rights Subcommittee: Jay Weiner (MT), Mary Verner (WA). NARF members participating in the Subcommittee in an *ex officio* capacity include: John Echohawk, Joel Williams, Steve Moore, Dan Lewerenz, and David Gover. Other *ex officio* members include Stanley Pollack, Ryan Smith, Vanessa Ray-Hodge, and Melanie Stansbury.

4. WRDA/CORPS POLICIES

Work to date: The Council has in the past supported regular passage of a Water Resources Development Act (WRDA), and has addressed a number of specific policy issues, while not taking any position on specific project authorizations. The Council has raised concerns with the U.S. Army Corps of Engineers' approach to identifying and regulating the use of "surplus waters," and Corps drought authorities related to Corps projects. The Council also worked successfully to exclude irrigation water supply canals from federal levee safety program, and to encourage the Corps to withdraw the Surplus Water Supply rulemaking. On May 10, 2022, the Council sent a letter in support of Senator Cramer's proposed legislation to create a committee with the Corps of Engineers and the States focused on cooperative federalism concerns surrounding the management of water resources.

2022-2023: The Council will continue to work with the Congress and Corps on WRDA and Corps-related issues, to ensure that state water rights and prerogatives are protected, specifically as it relates to natural flows, Corps storage and other issues.

Subcommittee: Jennifer Verleger (ND);

5. GROUNDWATER

There are a number of ongoing groundwater issues that pertain to WSWC policies or are otherwise of interest that the Committee will monitor and address on an as-needed basis.

A. Reserved Water Rights

Background: On March 7, 2017 the 9th Circuit (849 F.3d 1262) upheld the California District Court's summary judgment from Phase I of the trifurcated case, *Agua Caliente Band of Cahuilla Indians v. Coachella Valley Water District* (No. 15-55896). The 9th Circuit decision holds that the United States implicitly reserved a right to water when it created the Agua Caliente Reservation, and that the Tribe's reserved water right extends to the groundwater underlying the Reservation. The court acknowledged that it was unable to find any controlling federal appellate authority explicitly holding that the federal reserved water rights doctrine in *Winters v. United States*, 207 U.S. 564 (1908), extends to groundwater. Instead, it pointed to *United States v. Cappaert*, 426 U.S. 128 (1976) and *In re General Adjudication of All Rights to Use Water in Gila River System and Source*, 989 P.2d 739 (Ariz. 1999) as persuasive and implied authority for its decision, emphasizing that *Winters* does not distinguish between surface and groundwater or prohibit the inclusion of groundwater.

Given that the federal agencies have relied on tribal water rights cases in the past to press for reserved water rights to groundwater, the implications of the 9th Circuit decision could be far reaching, not only for states and tribes outside the 9th Circuit's jurisdiction, but also for federal agencies seeking to control groundwater appurtenant to federal lands.

As one example, the Forest Service issued a proposed groundwater directive May 6, 2014. Although the Forest Service asserted that the directive would not infringe on state-issued water rights or change how state groundwater and surface water quality regulations affect federal lands, the proposed directive would have: (1) required application of "...the Reservation or Winters Doctrine to groundwater, as well as surface water, consistent with the purposes of the Organic

Administration Act, the Wild and Scenic Rivers Act, and the Wilderness Act;” (2) required the Forest Service to evaluate all applications to states for water rights on lands adjacent to NFS lands; and (3) would have presumed that groundwater and surface water are connected unless proven otherwise. Western Governors strongly objected to the directive, as did the WSWC, which worked with the Forest Service to modify it. The Forest Service later withdrew this proposed directive.

WSWC position #466 notes that no federal statute has addressed any federal property or other rights to groundwater, and opposes “...efforts that would establish a federal ownership interest in groundwater or diminish the primary and exclusive authority of States over groundwater.”

Subsequent court decisions that have cited to *Agua Caliente’s* groundwater holding include: (1) *Silver v. Pueblo Del Sol Water Co.*, 423 P.3d 348, 353 (Ariz. 2018); (2) *State ex rel. State Eng’r v. United States*, 425 P.3d 723, 733-734 (N.M. Ct. App. 2018) (oblique reference, as the settlement at issue included reserved groundwater); (3) *United States v. State (In re CSRBA Case No. 49576 Subcase No. 91-7755)*, 448 P.3d 322, 350-351 (Idaho 2019); (4) *Baley v. United States*, 942 F.3d 1312, 1338, (Fed Cir. 2019) (although for the discussion on groundwater this case cites to *Cappaert v. United States*, 426 U.S. 128, 142-43 (1976)); (5) *United States v. Walker River Irrigation Dist.*, 473 F. Supp. 3d 1150, 1156-1157 (D. Nev. 2020).

Additionally, the Department of Defense is considering reserved water rights claims to the use of groundwater for Naval Air Weapons Station China Lake in the groundwater basin adjudication *Indian Wells Valley Water District v. All Persons Who Claim a Right to Extract Groundwater in the Indian Wells Valley Groundwater Basin, etc., et al.* (Orange County Superior Court, California, 30-2021-01187275-CU-OR-CJC).

2022-2023: The Committee will continue to work to ensure that state water rights and prerogatives are protected, specifically as they relate to tribal and non-tribal federal water rights and state authority over groundwater.

B. Groundwater Storage Projects

Background: In 1983, Congress passed the High Plains States Ground Water Demonstration Project Act, authorizing the Bureau of Reclamation to undertake a westwide groundwater recharge program. In 1989, WSWC and Reclamation entered a cooperative agreement to prepare a number of case studies to evaluate project effectiveness, identify economic and institutional problems such as the allocation of project costs and requisite legal authorities, and recommend alternative solutions to improve public policymaking with respect to future groundwater programs and projects. As a result of this agreement, WSWC prepared two reports in 1991 and 1998, titled *Ground Water Recharge Projects in the Western United States*. Among other recommendations to encourage recharge opportunities, the 1998 report suggested that each state examine its own legal and institutional systems to assure that they adequately address groundwater recharge, amending statutes as necessary to recognize it as a beneficial use, and reasonably protect the right to recover recharged waters.

2022-2023: In coordination with the Water Resources Committee, the Legal Committee will work on updating the information in the old reports, and prepare a new summary report. The Committee will query the states to review and update their relevant laws on groundwater storage, particularly as they relate to groundwater banking or Aquifer Storage and Recovery (ASR) projects.

6. WATER RIGHTS

Some of our states have expressed interest in understanding how other states approach different aspects of the management and administration of water rights, including what qualifies as beneficial uses, extensions of time to prove beneficial use to perfect a water right application, and statutes or rules or court procedures governing curtailments in times of scarce water resources, and regulation of water wells. In December 2020, Council staff began distributing a series of survey questions to member states to facilitate this understanding. In 2021, WSWC members responded to the survey questions, and WSWC staff began compiling the responses into four separate reports.

A. State Water Well Construction Rules and Regulations

Background: The State Engineer, or other state official, is required to make rules regarding well construction and related regulated activities and the licensing of water well drillers and pump installers. Various states have varying requirements, which may change from time to time. The purpose of these rules is to: (1) assist in the orderly development of underground water; (2) insure that minimum construction standards are followed in the drilling, construction, deepening, repairing, renovating, cleaning, development, testing, disinfection, pump installation/repair, and abandonment of water wells and other regulated wells; (3) prevent pollution of aquifers within the state; (4) prevent wasting of water from flowing wells; (5) obtain accurate records of well construction operations; and (6) insure compliance with the state's authority for appropriating water. The rules establish administrative procedures for applications, approvals, hearings, notices, revocations, orders and their judicial review, as well as requirements related to well construction standards, such as casing, and procedures for monitoring, reporting and criteria for the waivers of certain requirements.

2022-2023: Council staff will prepare a report of the 2021 responses to the survey questions. The Committee and Council will also provide a forum for the discussion of best management practices.

Subcommittee:

Timeframe:

B. Proof of Beneficial Use of Water and Extension Criteria

Background: Beneficial use is the measure of any right to the use of water in the West. The State Engineer, or other state official, on behalf of the State, may grant a permit to put water to beneficial use but evidence or proof of completion of the work necessary to then actually put the water to use is also required. Only after development is done and the water is being fully put to beneficial use, will a water right be granted, which will be limited to the extent and nature of use in the accepted proof. This also applies to requests to change the use of a water rights, whether changing the point of diversion, use or purpose of use, or location water is returned to a natural source. Generally, some specific period of time will be allowed to complete the work, and if needed applicants may request an extension of time. The specific criteria for proof of beneficial use and extending timelines may vary by state.

2022-2023: Council staff will compile responses to the 2021 survey questions and report on the results. The Committee and Council will also provide a forum for the discussion of best management practices.

Subcommittee:

Timeframe:

C. Calls and Curtailments

Background. Droughts in many areas of the West have highlighted state procedures and methods of enforcing curtailment of water uses and administration of water rights in a priority system, particularly where junior groundwater pumping, insufficient carriage water, instream flow for fish and wildlife, junior municipal supply, and federal reserved rights are at issue.

2022-2023. Council staff will prepare a report on the 2021 survey responses. The Committee and Council will also provide a forum for a discussion of water rights enforcement.

Subcommittee:

Timeframe:
